The advance of one cent a loaf in the price of bread means the difference between plenty and scarcity in many poor families.

A small baker explains the situation by saying: "We belong to the flour dealers in the morning, we belong to them in the evening, and when we die I guess they will own

Yes, and the flour dealers belong to the wheat speculators. The devil has a mortgage on these gamblers, but the trouble is he is too slow in foreclosing it.

Bread is dearer because flour is dearer. And flour is dearer, not because wheat is scarce—the shortage would not create any such advance—but because the speculators have run up the price of grain by controlling the visible supply against their adversaries. Gambling in grain futures ought to be forbidden, under penitentiary penalties.

A CHANCE AT HOME.

The stabbing to death of a man at 9 o'clock in the evening, on one of the best lighted and most crowded streets of this city, will give our detective force something to do a home without bothering itself at present about the Whitechapel murders in London.

The victim, it appears, was addicted to gambling, and the circumstances of his assassination would seem to indicate revenge for money losses as the cause of his taking off. It ought to be possible to learn where and with whom FL ACCONIO had been playing his last games.

Yet this murder in sudden heat, regardless by men of his race through jealousy. May not the old question fit: "Who is she?"

DONNYBROOK HARMONY.

THE EVENING WORLD'S grapevine telephone connections, illustrated and reported on the first page to-day, show the true inwardness of the Mayorlty complications. Confusion worse confounded is no name for the situation.

THE WORKINGMAN'S SHARE.

A great many workingmen are protection ists, and, politics aside, are interested in the question whether they are getting the benefits which the tariff ostensibly gives them. Judge THURMAN, in his letter of accept-

ance, asks if it is not undeniable "that the duties proposed by the Mills bill far exceed the difference between American and Euro mean wages?"

The total average percentage of labor cost m-the manufactured farticles in this country is about 21 per cent. As the present average duty is 47 per cent. it appears that the manufacturers pocket 26 per cent. of "protection" ostensibly maintained for the benefit of

It thus appears that either wages in the protected industries are too low or the tariff is too high. Certain it is that labor is not getting its share.

Mayor Rocaz, of Chicago, put his fist down hard and compelled a settlement of the street car strike. The men get 6 per cent advance in wages, the working time is cut down to ten and twelve bours and all the old men are to be reinstated. Fancy our Mayor doing a thing like that, with his ideas of the sacred rights of corporate property and the danger f " secret cabals " of workingmen.

The League Pennant has been duly presented and was accompanied with a haudsome benefit and joyous popular demonstration. Now for the World's Championship. And perhaps Mayor Hawrer won't deny that banser a brief flutter from the barren City Hall

THE WHITECHAPEL MYSTERY More Theories Advanced by Interested "Evening World" Readers.

In the Editor of The Evening World: I have thought a great deal about the Whitechapel mystery, and I believe the guilty person is a man, the kind of man we call 'crank," craving notoriety at any cost, like Charles Guiteau, for instauce. No doubt he charles Guiteau, for instance. No doubt he reads the newspapers every day with great pleasure, and would gladly give humself up for the sake of the sensation it would make if he were not afraid of being hung. I feel sure "Creole" is wrong in thinking it a negro. Some of the Southern negroes are very brutal, but they are not brave, and one of them would lack the courage to commit such a series of crimes in a place like London and away from the satety of his naive swamps away from the safety of his native swamps

Watch the Man Least Suspected.

To the Editor of The Evening World The Whitechapel murders are evidently the work of a man who has been injured in one way or another by the fair sex. Driver to despair, he has made up his mind to ge square with the sex that has caused him his trouble. The result is the Whitechapel murders. The murders are committed in the for him easiest to cut her throat, and at the same time prevent her from making an outcry. Then as soon as he got her silenced he carries her to the spot where she is found, and that is also the spot where he does the rest of his butchery. He must be a man well acquainted with Whitechapel and its characters, and who goes around among the police with an innocent face. My advice is therefore this: Watch the man whom you least suspect.

Young Moran was in business here not long ago, but bought a farm at Waco and settled down there. Mr. Moran is deeply affected by the news of the tragedy, and refuses to talk about his son's fets.

IMPECIAL TO THE WORLD. AUGUSTA, Me., Oct. 15.—While Mr. Blaine is journeying through the West Joe Manley, his spatches telling Maine Republicans to be of good But nevertheless, Maine voters are not placing much reliance this year on the political forecasts sent out from the office of Joe Manley, supposedly with the cognizance of the "Plumed Knight" meelf. The fact is that Mr. Manley proved himself such a poor hand as a political prophet in 1884 as to have lost the confidence even of his own people, and the despatches which now emanate from him telling of enormous Republican gains, and of the Republican victory which he says is assured, are being compared with like missives which Manley sent out four years ago this month. Just four years ago yesterday he promulgated this tip from the inside:

The election of Blains and Logan is certain, the Presidential contest is settled and James G. Blains's election is made certain, (Signed) J. H. MARLEY.

A week later these were the cheering words: Indians can be relied on for at least 12,000 major or Blaine and Logan, with the chances that Virgi fill give her electoral vote to the column.

On Oct. 24, 1884, Manley telegraphed: An old-fashioned Democrat gave Blaine New Yorkiste by 100,000 plurality, while a conservative estimate makes the plurality just 26,150. Four days before election he wound up by de-claring that Blaine would carry every Northern State. It is in the light of these predictions of 1884 that Manier's friends receive his words with doubtful feelings of their ever being realized.

The Anglo-Suxon's Bad Tendencies. To the Editor of The Evening World: In far too many cases marriage is a failure.

There is too much marrying for wealth, position, society and fashion in these days-not enough for love, home and family. When one marries for style and then adopts a pet dog for a child the marriage state is degraded and must be a failure. God instituted and designed marriage for a sublime success, but the Anglo-Saxon is evidently bent on making it a ridiculous failure. Among the Germans the Irish and the Hebrews marriage is selden it a ridiculous failure. Among the Germans, the Irish and the Hebrews marriage is seldem a failure. But the enterprising, ambitious, selfish, dare-devil Anglos seem to have raised Cain with matrimony and are trying to see if they are able to club the institution to death. Societies, leagues and clubs, distaste for home and children, scramble for wealth, extravagance, display and splurge, together with loose and heterogeneous divorce laws, seem to weaken and minimize respect and regard for the matrimonial state. I am glad that the wid-awake Evenna World has called serious attention to the important subject. Let us halt, reflect, sober down and fall in line with the good old marriage and home customs of our worthy ancestors, with the best incresss of society and the beneficent designs of Providence, and marriage will seldom, if ever, prove a failure. prove a failure.

the Editor of The Evening World :
Knowing that THE EVENING WORLD always grants a reasonable request, I write to ask if you do not think it would be a very good idea for the "L" roads to put a list of the stations in the cars and at every station. It s very disagreeable for a stranger in this city having to depend on the guards to tell the stops. Hoping some of the officials of the read will see this, also hoping The Evenino World success for its second year, I remain, WORLD SUCCESS 101 PROPERT G. EARLE.

To the Editor of The Evening World In behalf of some amateur ball clubs of this city I write you this letter, asking if you would help the organization of a parade in would help the originization of a parade in honor of the Giants. I think that if properly notified at least two hundred uniformed clubs would participate. Hoping that this will have your attention, and that you will give it due notice in the columns of The Evening World. I remain yours respectfully, E.F. Alexini, P.O. box 2,452, city. Our rugged ancestors, who pierced the wilderness, built their uncouth but countertable Log Cabins and started the clearings in the woods, which in time become the broad, fertile fields of the modern farmer, found i roots and herbe that lay close at hand nature's potential to the property of t remedies for all their common ailments. It was only is very serious osees they sent for old "saddle-bags" with very serious cases they sent for old "saddle-bags" with his physic, which quite as often killed as cured. Latter-day society has wandered too far away from nature, in every way, for its own good. Our grand-fathers and grandmothers lived wholesomer, purse, better, healther, more natural lives than we do. Their minds were not filled with noxious tams, nor their bodies

minds were not filled with noxious isms, nor their bedies saturated with poisonous drugs.

Is it not time to make a change, to return to the simple vegetable preparations of our grandmothers, which contained the power and potency of nature as remedial agents, and in all the ordinary aliments were efficacious, at least harmless?

The proprietors of Warner's Log Cabin remedies have thought so, and have put on the market a number of these pure vegetable preparations, made from formulas secured after patient searching into the annals of the past, so that those who want them need not be without

Among these log Cabin remedies will be found "Log Cabin sarsaparilla," for the blood; "Log Cabin hops and buchu remedy," a tonic and stomach remedy; "Log Cabin cough and consumption remedy," "Log Cabin hair tonic," for strengthening and renewing the hair "Log Cabin extract," for both external and internal pplication; "Log Cabin liver pills," "Log Cabin rose ream," an old but effective remedy for catarrh, and "Log Cabin plasters." All these remedies are carefally prepared from recipes which were found, after long investigation, to have been those most successfully used by our grandmothers of "ye olden time." They are the simple, vegetable, efficacious remedies of Log lays.

catch great, big fish in it, and it is very strong.

"You would not guess what these glass balls are used for," continued the charming young artist. "They are the floats of the net. That water in them is sea water. Though they try to make the balls perfectly air-tight the sea, beating against them, forces itself in. Most of them are half full of water. When they get too full they rather impair the usefulness of the ball as a float.

"Fancy those hardy, sun-browned, weather-beaten fishermen of Gloucester spreading their nets of lace with this garniture of crystal balls! I thought it was a pretty idea to make a Gloucester souvenir of this corner of my studio. That snow-white net is perfectly new, but the coffee-colored one and that Vandyke brown one are seasoned by the sea."

At the Grand Central Depot a diminutive newsdealer with a bundle of papers under his arm boarded the car and edged his way in between the legs of the conductor, who was busy counting his change and didn't see the intruder till he was inside.

Haif way up the car the latter caught sight of the fat boy's legs, and his small black eyes began to twinkle with ghoulish glee. As he passed the cherub he administered a hasty but vicious pinch to the rear portion of his plump and inviting anatomy. It made the fat boy start and pucker up his big flabby checks as if he was going to cry. The passengers tittered and the fond mother looked at her tender offspring with alarm in every feature.
